

## REPORT ON OVAL SHAPE

An Oval has the form, shape or outline of an egg. Many distinct curves are commonly called ovals or are said to have an “Oval Shape”.

An activity was conducted in Nursery class on 18/12/18 Tuesday on “Oval Shape”. Teacher had given them a paper cut in oval shape. The student had to paste it on a chart paper in sequence to make butterfly. The kids participated enthusiastically in the activity and enjoyed it very much.
