

## SENSORY BOOTH

The Pre-primary wing put a Sensory booth on 13/07/2018. Different sensory stations were put to give hands on experience to the children. For each sense booth (Sight, Taste, Hearing, Smell & Touch) an area was allocated with items pertaining to its specific needs. In Sight Booth - kids experienced a variety of visual aids. In Smell Booth – they were made to smell different aromas. In Taste Booth – they were made to taste different eatables and experience the taste of sweet, sour, bitter, salty and spicy. In Touch Booth – kids were made to experience different sensation – hard, soft, rough, spongy, and smooth. In Hearing Booth – kids were made to listen different types of sounds. It was indeed an experimental learning for entire Pre –primary.
