

BIRDS ACTIVITY

Birds are a group of vertebrates which evolved from dinosaurs. They are endothermic with feathers. Birds live all over the world. They are the class of tetrapods with the most living species: about ten thousand.

An activity was conducted in Nursery class on 10th October 2018. The students were given a flashcard, wooden puzzle and wooden toy, they have to identify the bird and match it with flashcard, and have to speak the name of the bird. The students enjoyed the activity specially playing with the wooden puzzles.
