

## SEMI – CIRCLE ACTIVITY

A semi-circle is a half of a circle off at its diameter, or at the widest ends. It has one curved edge and one straight edge.

The Junior Kg. class conducted an activity on semi- circle and recap of Oval shape on 28<sup>th</sup> September 2018. In this activity teachers used many objects of semi-circle to make the concept clear for the students; they used umbrella, rainbow, wooden blocks, and flash cards. The students were given a paper with circle shape; they cut the paper in half and made semi-circle shape, and pasted the proper spelling on it. The students enjoyed a lot using a non-sharp scissors.
