

ACTIVITY ON TRANSPORTATION

Transport or transportation is the movements of humans, animals and goods from one location to another. Modes of transport include air, land (rail & road), and water. The Jr.Kg class conducted an activity “MODES OF TRANSPORT” on 12th September 2018. In this activity different colour chart papers were prepared by the teachers representing various mode of transport like ,sky blue for air transport, blue for water transport, black for road transport, and brown for rail. Pictures of vehicles were given to the students; and they have to identify the pictures and paste it on its corresponding chart representing correct mode of transport. The students successfully completed their activity, and with the help of this activity the kids are able to understand the modes of transport with play way method.
