

REPORT ON FLOWER ACTIVITY

Flower is the beauty of nature. It is a special part of the plant. Flowers are the reproductive parts of flowering plants. In all plants, a flower is usually its most colourful part. There are many different kinds of flowers in different areas in the world.

An activity was conducted in Nursery class on 4th January 2019 Friday. The class teacher took the students in garden and showed different kind of flowers. Later on, a flash card of flowers and some real flowers were shown to them and they recognised the flowers. The teacher also provided a picture of flower to them and the students had to colour it. The students liked the activity very much.
