

ENVIRONMENT

Environment protection is a practice of protecting the natural environment on individual organizational or governmental levels for benefit of both the environment and humans. Due to the pressure of overconsumption, population and technology of the biophysical, environment is being degraded sometimes permanently. This has been recognized and government have begun placing restraints on activities that cause environmental degradation. Since the 1960's activities of environmental movement has created awareness of the various environmental issues. There is no agreement on the extent of the environmental impact of human activities and even scientific dishonesty are occasionally debated.

"It is our duty to save Environment Beauty"
